

PARENT INFORMATION

High schools and career centers surrounding the Kokomo area can participate in a \$3.2 million grant for the next 4 years. This grant provides for many services but directly for your student is the opportunity to start as an enrolled participant in their 11th grade year in high school to begin acquiring courses that lead to an associate degree – all PAID FOR through this grant. The program supports efforts in our local schools through dual enrollment and certification testing. Students who are successful in their high school program can continue their education after graduation from high school at Ivy Tech Community College in one of the targeted programs with their courses and books paid for by this Youth CareerConnect Grant. Current 11th grade students must be enrolled before December 15.

If you are interested in enrollment in this program for your 11th grade student, please contact Jan Bailey, Program Manager, Ivy Tech Community College, Youth CareerConnect Grant, Integrated Technology Education Program (ITEP) at jabailey@ivytech.edu or (800) 459-0561, Ext. 5541

Parent night events will be scheduled soon.
